

**LOS ANGELES GENERAL MEDICAL CENTER
6C / MEDICAL-SURGICAL
SCOPE OF SERVICES**

Departmental Purpose:

6C is a 32-bed Medical/Surgical unit that serves as an important component of the continuum of care in the LAG+USC Medical Center. The unit exists to provide nursing care to patients with various orthopedic injuries and medical-surgical conditions requiring treatment and hospitalization for acute episodes or exacerbation of their illness. The care is ongoing and encompasses diagnosis, treatment and follow-up care.

Types and Ages of Patients Served:

Unit 6C cares for adolescent, adult and geriatric patients from a diverse cultural and socio-economic background with acute medical problems and patients preparing to undergo or have undergone procedures for treatment of various problems and injury. Major medical diagnosis includes but not limited to injuries to the musculoskeletal system, Urology, Ophthalmology and medical surgical diagnosis.

Methods Used to Assess Patient Needs:

An interdisciplinary approach to patient care management is used to assist the patient in making an educated decision about his/her care. Nursing, Orthopedics, Urology, Ophthalmology and Medicine/Surgical Services house staff work collaboratively under the direction of the orthopedic, medicine or surgical services attending to develop and implement a plan of care. Additional collaboration exists with various ancillary and support services which include but are not limited to Social Services, Diagnostic, Pharmacy, Food and Nutrition, Epidemiology, Wound Ostomy Care Nursing, Home Health Nursing, Physical Therapy, Occupational Therapy, Pain Management, and Utilization Review.

Scope of Service and Complexity of Care:

The care of the patients involves providing the highest level of nursing and medical management using a multidisciplinary team approach; providing an environment that is safe, therapeutic, and conducive to healing and restoration to patient's optimal level of functioning; providing treatment necessary to minimize symptoms; preventing complications associated with disease and disorder; preventing the transmission of infection; promoting patient comfort; performing required diagnostic and therapeutic procedures; educating patient/family to improve self-care abilities, health maintenance, and rehabilitation; facilitating discharge from the acute care setting to the community; and ensuring continuity of care by encouraging compliance with follow up care and treatment.

Volume and Quality Control Indicators:

- Nursing Process
- PCA
- Restraints
- Medication Error Reduction Plan/Medication Administration Record
- Blood Administration
- Fall Prevention
- Pharmacy Rounds
- Core Measures
- Patient/Family Teaching
- Patient Identification
- Environmental Rounds
- Pressure Ulcers

SCOPE OF SERVICES**

Volume & Quality Control Indicators continued:

- Central Line Associated Bloodstream Infection
- Catheter Associated Urinary Tract Infection
- Patient Experience

Performance Improvement Indicators:

- Patient Experience- Hourly Rounds
- Homeless Discharge
- Restraints

Recognized Standards:

Care is provided consistent with applicable regulatory, accreditation, and professional standards inclusive of but are not limited to the Centers for Medicare and Medicaid Services, California Department of Public Health, OSHA, The Joint Commission, Food and Drug Administration, California Board of Registered Nursing, American Nurses Association, American Medical Association, Academy of Orthopedics, National Institute of Health, and others.

Availability of Necessary Staff:

The unit operates 24 hours a day, 7 days a week. The nursing staff reports to a Nurse Manager (NM) who works collaboratively with the Chief of Medicine and Surgical Services. The Nurse Manager is responsible for providing sufficient quantity of nursing staff to meet the needs of the patients based on acuity and census of the unit. She is responsible for the quality of the nursing care provided and the performance of the assigned staff. Staff on the unit has specific competency assessments for their professional level and/or job description. Registered Nurses and Nursing Attendants provide patient care. Clerical staff provides support.
