POLICY

Physician "Medication Order Sets," may be used by a categorical service. The order sets are developed by DHS provider subcommittees, approved by the DHS P&T Committee, and entered into the electronic health record (EHR) .

PROCEDURE

Completion of the Physician Medication Order Set follows a set pattern, where information such as: (1) diagnostic procedures; (2) lab orders; (3) medications (listed as generic), and, (4) care instructions/interventions are delineated as appropriate.
