POLICY

1. Orders are electronically transmitted to the Inpatient Pharmacy.
2. Pharmacist will screen for appropriate dose, contraindications, drug interactions with other I.V. or oral medications, and incompatibilities.
3. The order will be verified by the pharmacist through the electronic health record (EHR) with the appropriate information.
4. Labels will be automatically generated for the medications.
5. Initial label, indicating expiration date and time.
6. Have stat doses delivered immediately; other doses are placed in refrigerator or designated patient unit container for delivery prior to next administration time.
