MISSION:

Our mission is to provide exceptional patient-centered, occupation-focused, evidence-based, culturally sensitive, and equitable care to all we serve.

VISION:

With our unique perspective of occupations as each person's everyday activities that occupy time and bring meaning and purpose to life, we strive to be the recognized leader in physical disabilities rehabilitation by:

- Integrating occupation-based care founded on our unique knowledge of roles, habits, routines, and how occupation can be utilized to positively affect performance in the areas of activities of daily living, instrumental activities of daily living, health management, rest and sleep, education, work, play, leisure, and social participation
- Delivering evidence-based and expert practice for assessment and intervention of upper extremity, visual-perceptual, functional cognition, and other performance deficits to enable maximum engagement in valued occupations and life roles
- Collaborating with each patient throughout a seamless continuum of care
- Creating innovative model programs to meet individual and community needs related to wellness, disease prevention, self-management, and rehabilitation
- Contributing to the body of occupational therapy and occupation-based outcomes through education, research, presentations, and publications
- Partnering with key community leaders and agencies to promote the value and efficacy of Occupational Therapy
- Demonstrating leadership in community service organizations and professional involvement on local, state, national and international levels
