

Media Label Reprint

Use Media Label Reprint to print a media label without having to use Microbiology Procedure Setup. You can enter accessions and quickly send labels to the printer.

1. Enter a valid accession number in the Accession box, and press TAB, or scan the accession number from a media or specimen label bar code.
2. Select the printer you want to send the media labels to
3. Select Reprint from the Task menu or click on the first icon to print the media labels.
