## Warming Cabinet for Solutions and Blankets ATTACHMENT 1 Solution/Linen Warming Cabinet Temperature Log

## **INSTRUCTIONS:**

A. Record the temperature of the warmer daily in the appropriate section next to the date. Note: Acceptable maximum temperature: 40°C for IV Solutions and 54°C F for Linens

B. Adjust temperature as needed to maintain acceptable range.

C. Indicate corrective actions or changes to adjust temperature in the comments section of log. Note: Report malfunction of warmer to Facilities Management Department x73991

D. Begin a new form on the first of each month and return completed logs to Nurse Manager.

Month: \_\_\_\_ Year: \_\_\_\_Location of Warmer: \_\_\_\_ Type of Warmer

(Top): IV solution Irrigation solution (Bottom): Linen

| Date | Temperature |        | Initial: temp check                | Comments/Actions |
