

# LAC+USC HEALTHCARE NETWORK

## UNIT 7D MEDICAL-SURGICAL

### SCOPE OF SERVICES

#### **Departmental Purpose:**

7D is a 32-bed Medical/Surgical unit that serves as an important component of the continuum of care in the LAC+USC Healthcare Network. The unit exists to provide nursing care to patients with medical conditions requiring treatment and hospitalization for acute episodes or exacerbation of their illness. The care is ongoing and encompasses diagnosis, treatment and follow-up care.

#### **Types and Ages of Patients Served:**

Unit 7D cares for adult and geriatric patients from a diverse cultural and socio-economic background with acute medical problems and patients preparing to undergo or have undergone procedures for treatment of various problems and injury. Major medical diagnosis includes Chronic Renal Failure, Nephrotic Syndrome, Peritonitis, Vascular access placement, renal insufficiency, UTI, acute Renal Failure.

#### **Methods Used to Assess Patient Needs:**

An interdisciplinary approach to patient care management is used to assist the patient in making an educated decision about his/her care. Nursing and Medicine/Surgical Services house staff work collaboratively under the direction of the medicine or surgical services attending to develop and implement a plan of care. Additional collaboration exists with various ancillary and support services which include but are not limited to Renal house staff, Social Services, Pastoral Care, Diagnostic, Pharmacy, Food and Nutrition, Epidemiology, Wound Ostomy Care Nursing, Home Health Nursing, Physical Therapy, Occupational Therapy, Respiratory Therapy, Pain Management, and Utilization Review.

#### **Scope of Service and Complexity of Care:**

The care of the patients involves providing the highest level of nursing and medical management using a multidisciplinary team approach; providing an environment that is safe, therapeutic, and conducive to healing and restoration to patient's optimal level of functioning; providing treatment necessary to minimize symptoms; preventing complications associated with disease and disorder; preventing the transmission of infection; promoting patient comfort; performing required diagnostic and therapeutic procedures; educating patient/family to improve self-care abilities, health maintenance, and rehabilitation; facilitating discharge from the acute care setting to the community; and ensuring continuity of care by encouraging compliance with follow up care and treatment.

#### **Volume and Quality Control Indicators:**

- Nursing Process
- PCA
- Restraints
- Medication Error Reduction Plan/Medication Administration Record
- Blood Administration
- Fall Prevention
- Pharmacy Rounds
- Core Measures
- Patient/Family Teaching
- Patient Identification
- Environmental Rounds

#### **Performance Improvement Indicators:**

- Pain

**LAC+USC HEALTHCARE NETWORK  
UNIT 7D MEDICAL-SURGICAL  
SCOPE OF SERVICES**

California Board of Licensed Vocational Nursing, American Nurses Association, American Medical Association, Academy of Nephrologists, National Institute of Health, and others.

**Availability of Necessary Staff:**

The unit operates 24 hours a day, 7 days a week. The nursing staff reports to a Nurse Manager (NM) who works collaboratively with the Chief of Medicine and Surgical Services. The Nurse Manager is responsible for providing sufficient quantity of nursing staff to meet the needs of the patients based on acuity and census of the unit. She is responsible for the quality of the nursing care provided and the performance of the assigned staff. Staff on the unit has specific competency assessments for their professional level and / or job description. Registered Nurses, License Vocational Nurses and Nursing Attendants provide patient care. Clerical staff provides support.
